ANNEX A

Comments from JP

1. IEC 60079-28 and IEC 62086-1 should have been included in the table of “6. STATISTICS”?

Secretariat response

It has been confirmed that Item 6 should include both IEC 60079-28 and IEC 62086-1. It has also been confirmed that “zero” certificates have been issued against these standards.

2. Do we understand that IEC 61241-11 is outside of “Scope of Application” of ZELM as ExCB?

Secretariat response

Following consultation with the Assessment Team, and also after a comprehensive review of all site assessment documentation, the secretariat confirms that **IEC 61241-11 Electrical apparatus for use in the presence of combustible dust - Part 11: Protection by intrinsic safety 'iD'** was included as part of the assessment. The IECEx Officers have been informed of this editorial omission. Therefore IEC 61241-11 has been included in the scope of the ZELM assessment.
